BEFORE YOU GET STARTED

EarningsBeats.com is a research, guidance, and education platform. Our research efforts are centered around providing our community valuable and reliable information to not only improve their trading knowledge, but to also improve their trading results.

We are not Registered Investment Advisors and are not suggesting that you buy or sell any financial security based off the information and research that we provide. You should always consult your own financial advisor before buying or selling any financial security.

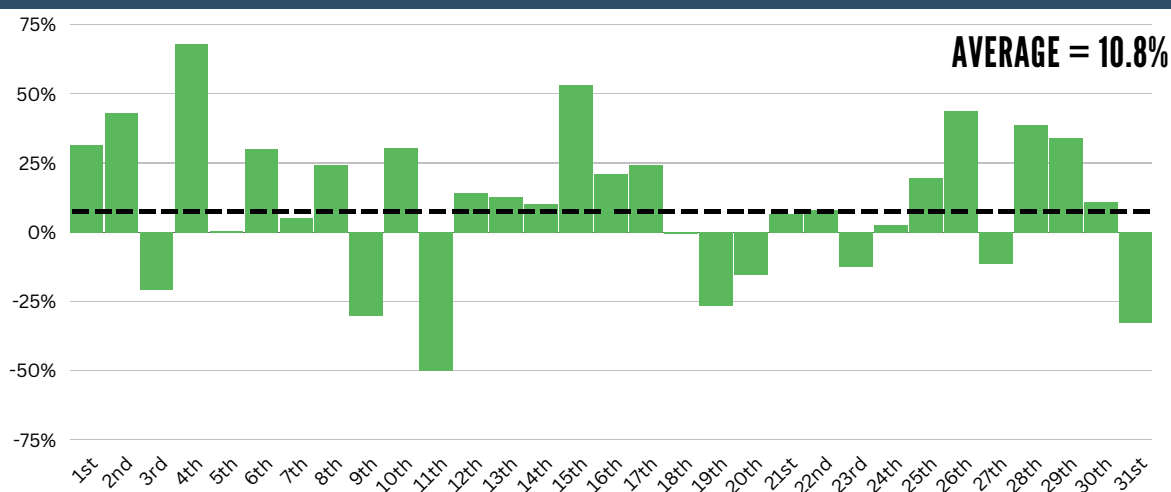

S&P 500 (\$SPX)

During this secular bull market since September 2013, the S&P 500 gained an average 10.8% per year, outperforming its long-term historical average return of 9% per year. If every calendar day performed equally, there would be a consistent 10.8% annualized return each numerical day of the month... **but that's far from the case.**

The S&P 500's performance by calendar day fluctuates significantly and often predictably over an average month.

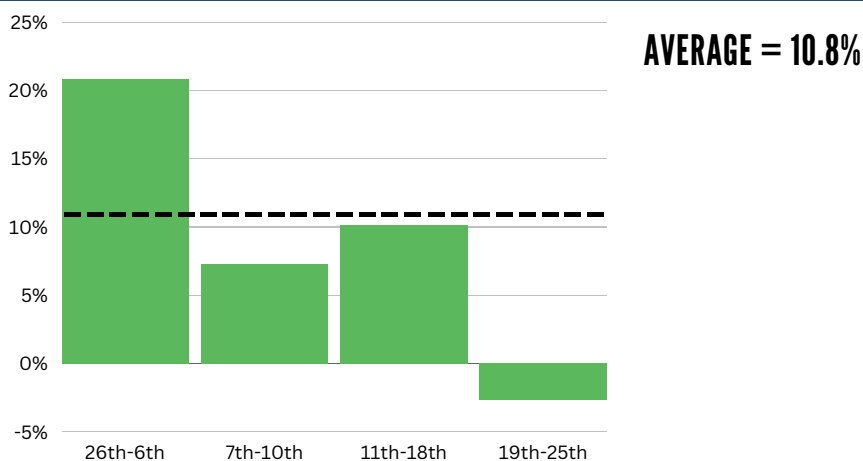

Check out performance by calendar day:

AVERAGE PERFORMANCE BY DAY OF MONTH (S&P 500 SINCE 2013)

On the following page, the days are grouped to highlight several key themes.

AVERAGE PERFORMANCE BY GROUPING OF DAYS (S&P 500 SINCE 2013)

For explanation on these cyclical market trends, read **Bowley Trend Part 1: Long-Term Trends since 1950**. The long-term patterns are still in play.

Our research is extensive. To make this report most useable, we've included two sections. The underlying data in both sections is the same, but is shown differently to accomodate personal preference:

- Section 1, page 5: Performance by individual stock
- Section 2, page 38: Performance by day of month

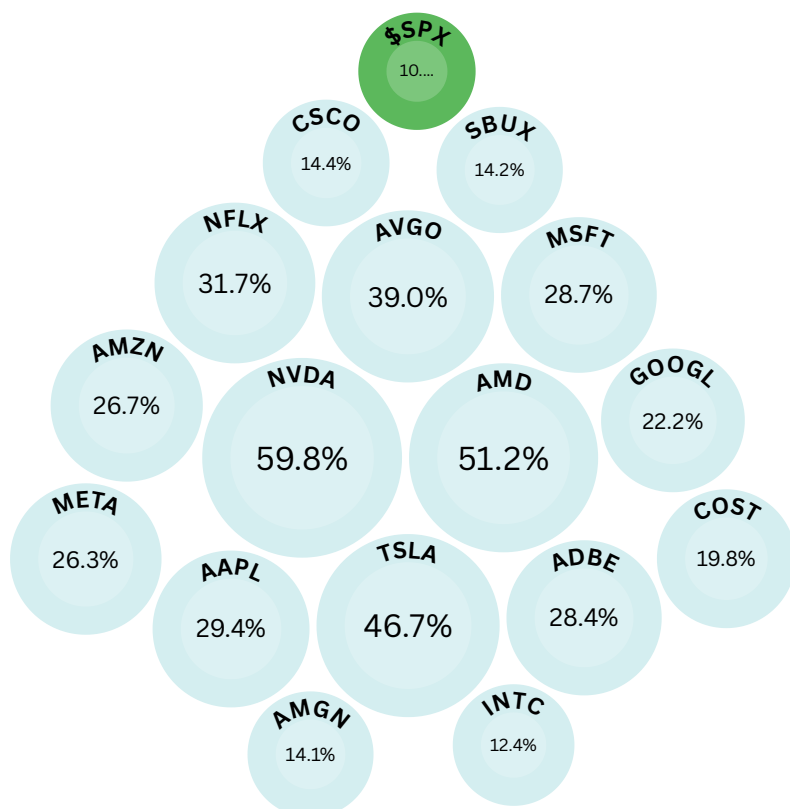

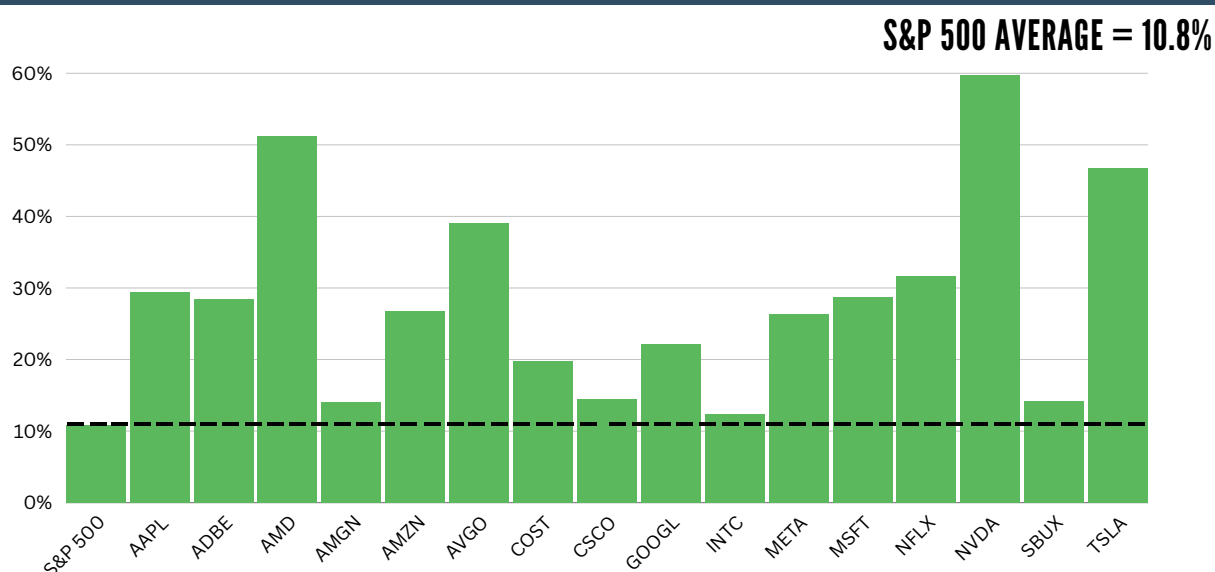

This report covers 16 popular stocks:

AAPL	AMZN	GOOGL	NFLX
ADBE	AVGO	INTC	NVDA
AMD	COST	META	SBUX
AMGN	CSCO	MSFT	TSLA

Without further ado, let's take a look at performance by individual stock.

BY INDIVIDUAL STOCK

AVERAGE ANNUAL RETURN IN SECULAR BULL MARKET (SINCE 2013)

During this secular bull market, the S&P 500 averaged an annual gain of **10.8%**, as previously discussed.

This section reveals how 16 popular stocks compare, as well as their average annualized gains (or losses) each calendar day over the past decade.

APPLE INC. (AAPL)

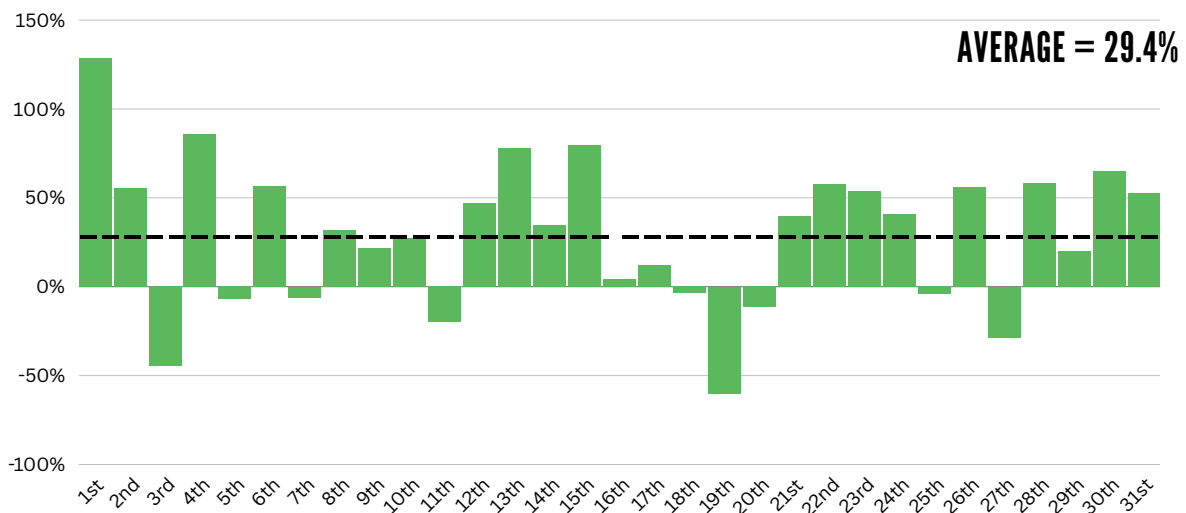

KEY FACTS

Best (Worst) Day: 1st (19th)

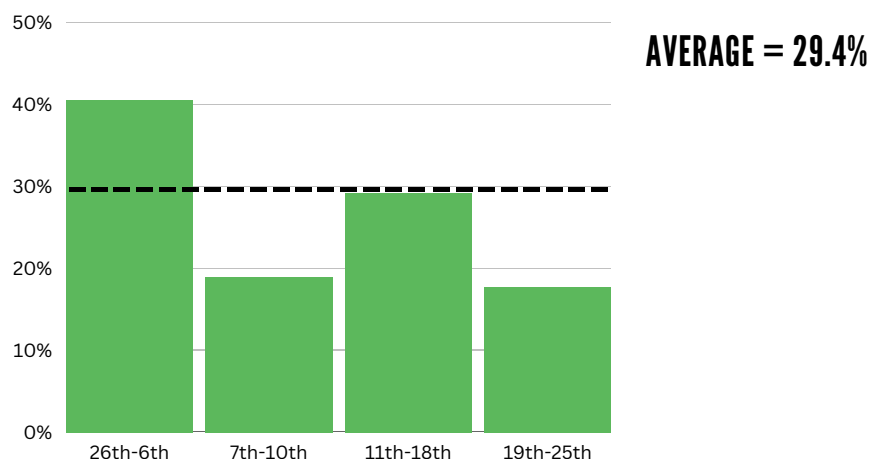

Best (Worst) Month: July (September)

Interesting Fact: Performs 5x stronger during 1st halves of calendar quarters vs. 2nd halves

Data since September 2013

BY CALENDAR DAY

This section examines how 16 popular stocks performed during this secular bull market **by calendar day**. As discussed, the S&P 500 gained an average 10.8% per year. Here's how the performance compares among stocks:

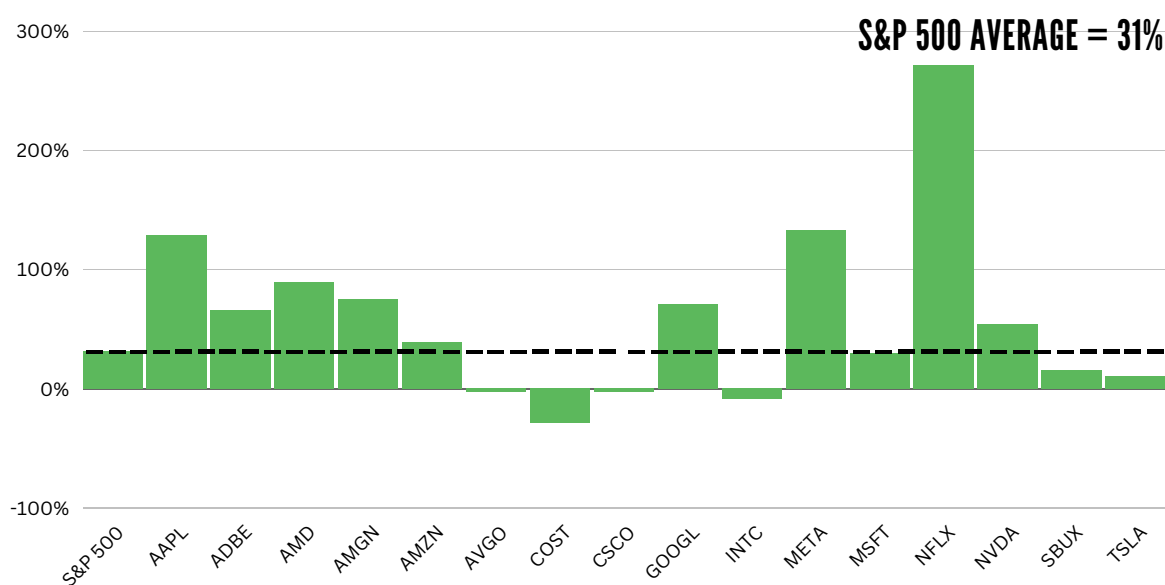

AVERAGE ANNUAL RETURN IN SECULAR BULL MARKET (SINCE 2013)

Next, we'll take a look at performance across individual stocks over the past decade. This is the same data presented before, but is now organized by calendar day (rather than stock) for alternate use.
